\$2,000.00	Capture Gaming	As we continue expanding our esports program we want our students to be able to experience all the areas of content creation. By purchasing a capture card and streaming equipment we open up an entirely new opportunity for streaming and video making for our students. The next piece of equipment we would like to purchase is a green screen and lighting. While the streaming equipment will allow students to grow in areas of content creation, a green screen and lighting will allow for massive growth in marketing and digital media. These additions will allow students to become familiar with an entirely new way to interact with video games. By assisting students in becoming more knowledgeable about esports in middle school, we give them more time to master skills that will be used in high school and ultimately help them secure a career in a rapidly growing industry. \$500.00	Floating Along to Music	Last year, Badger Springs had a flood that affected our music room and most of the pieces were unsalvageable. This grant would help us to give students the experience of playing music that is challenging while being attainable and increase inclusivity by purchasing music from composers that represent our demographic. A healthy music library will directly impact students by allowing them to have a larger catalogue of music to choose from when choosing what music we perform. Additionally, this will give them concrete examples of achievements made by composers that they can relate to.	Sebastian Siojo	Badger Springs MS	6th, 7th, 8th	The full budget will be used to purchase music that will be used by band students.
